Energy Fair
for 2012 is
cancelled

Have you
checked out
our
webpages
recently?
We are slowly
revamping the
site – let us
know what you
think!
<http://www.energy.edu.au/new-website/Index.html>

We still have
Groovers and
Chemistry Packs
available. E-mail
if interested.

Photovoltaic Panels close to being ready for school use

Panels are Kaneka thin film 600 X 900mm - if interested please e-mail.

Interested in text books that cover

- Introduction to Small Engines
- Introduction to Electronics

Both series are suitable for Years 7 to 12 and have three booklets in each series. E-mail if interested for additional information.

Have you registered to use our Moodle?

Lesson plans, assessments etc are currently available for Middle School classes. E-mail to find out more.

Uni SA launches the Barbara Hardy Institute

The website lists valuable up to date information on sustainability with lesson plans etc for school use. Well worth a visit:

<http://www.unisa.edu.au/barbarahardy/>

The association is considering signing with **NEALS** (Australian Education Copyright Group) It means that all educational material between States and the various educational organisations in Australia can share data without any charge. It would give us access to their material without fear of prosecution. Data can be marked not for sharing.

Landscape & Garden Design Competition launched

Habitat for Humanity, teachers and their students from the Murray and Mallee Regions are working with Habitat for Humanity and ourselves in designing and implementing a garden in Murray Bridge's AV Jennings subdivision for a struggling family. For additional information about the competition visit:

<http://www.energy.edu.au/new-website/Garden-1.html>

Have a Fair or Science week coming up?

The association has trikes that can be borrowed (conditions apply) to help publicise the day.

Solar Car 51 funds are not plentiful

Work is slowly progressing with Car 51 but funds will in the near future restrict how much can be done completed. A boat trailer that is being converted to carry the car, is near completion. If you are aware of any sponsor likely to give support in kind or financially, Ian would be grateful to hear from you.
